SinaLite

METALLIC FOIL
SETUP GUIDE

STEP 1:

Ensure the file matches the product's required dimensions.
Ensure that the artwork is created in **CYMK 300 dpi with 1/16 inch bleeds** on all sides.

Cut Line

Bleed Line

C **M** **Y** **K**

STEP 2:

Separate artwork into **two files**:

One is for **metallic foil finish**, for which the artwork's color should be set to **100% black (K)**.

K

Another file should be in the **CMYK color space for artwork that is not foil printed.**

PAULA BROWN

C M Y K

STEP 3:

Export all files into **PDF format with bleeds**.
